Dhyana, demands that truth realized in our inner consciousness penetrate into our waking consciousness and become effective there. The level of our consciousness determines the nature and quality of the life we live. So, rather than trying to stop thoughts and drop into a void, our meditations focus on dynamic methods of strengthening the power of the mind, the power of visualization and stimulate a ready flow of intuition and inspiration, which can be used in our life. The meditations help us to develop our power of concentration, in order to orient the whole of our consciousness towards our soul.

- Mahavathar Babaji

Through BREATH we understand The Science of Meditation and through The Science of Meditation alone we understand the Soul Science. Only after having a firm grasp of Soul Science can we begin to understand what to speak, what to eat... how to feel, how to touch, how to walk... When we know what all to do and how well to do, then that is The Science of Enlightenment

- Brahmarshi Patriji

Yoga is a scientific method of connecting the human soul with the super-soul - or God. Once a Yogi achieves this point of self-realisation, they are able to receive all types of universal energies.
